

Q&A: HEALTH INSURANCE AND COVID-19

If I have private insurance, will I have to pay for a coronavirus test?

The Families First Coronavirus Act required that all private insurance plans cover coronavirus testing without deductibles, coinsurance, or co-pays. That bill also prohibited plans from using tools like prior authorization to limit access to testing. The CARES Act makes a technical correction to ensure that the policy covers all tests that meet the appropriate standards. Insurers also have to cover fees for visits to the ER, an urgent care center, or a doctor's office associated with getting a test without cost sharing.

If I have private insurance, how does this bill affect the cost of a vaccine when one becomes available?

The Affordable Care Act required that preventive services and vaccines be covered by private insurance without cost-sharing. Normally, these services and vaccines are covered starting on the first day of the plan year beginning after they get a favorable rating or recommendation from the United States Preventive Services Task Force or the Advisory Committee on Immunization Practices. This section requires that coverage without cost sharing begin fifteen days after getting a favorable rating or recommendation.
